Press release

VIALTIS rolls out the TOLL2GO interoperable electronic automated toll payment solution in Germany and Austria.

Aix-en-Provence, France, 17th October 2011:

VIALTIS specialises in services for international road hauliers and is an accredited distributor for the TOLL2GO automated toll payment system.

The new TOLL2GO system is interoperable in Germany and Austria, and allows German and Austrian toll charges to be paid using a single unit.

TOLL2GO is the result of a partnership between the ASFINAG (GO-Box System) and Toll Collect GmbH companies. This service will allow hauliers to use the current Toll Collect unit (On-Board Unit or OBU) to pay toll charges and road taxes in Germany and Austria.

For hauliers using the German and Austrian road networks, VIALTIS offers subscription assistance for the new service and provides OBUs for vehicles with a rated gross vehicle weight of 12 tonnes and over, as well as a range of additional services (toll card management, monitoring of online transactions and invoices, automatic deduction of Austrian VAT, etc.).

Régis Cottureau, Director of Road Activity, explains: "The new TOLL2GO interoperable system makes things a lot simpler for road hauliers. And once again, VIALTIS has confirmed its commitment to offer customers an ever broader range of services and to promote systems encouraging automated toll payment interoperability throughout Europe - yesterday in France and Spain, today in Germany and Austria".

About VIALTIS:

VIALTIS is a service company dedicated to international road transport companies. A privileged partner of the IRU (International Road Transport Union, Geneva), the Group has 10 offices in Europe with more than 6,000 customers in over 40 countries. Since 1982, VIALTIS has developed lasting relationships with carriers of all sizes, thanks to its professionalism and expertise and by offering its customers substantial reductions in their charges. An independent road services expert, its business activities revolve around eight areas of competence: fuel, tax refunds on diesel fuel, recovery of foreign VAT and its financing, tolls and road taxes and ferry and train bookings and consultancy services throughout Europe. VIALTIS is ISO 9001:2008 certified.
